

Do you drive more than average in a year...

or in **STOP** or
GO traffic...

or on **SNOW**
and **ICE**...

or in **DUSTY** and **DIRTY** conditions..

or in temperatures above **90°F**

or on hilly or mountainous terrain...

or sometimes **TOW** a trailer or boat?

Then your driving conditions are considered
"SEVERE"

You should change your transmission  and 
every 25,000 miles or every other year.

All filters are not created equal – for a measurable difference in transmission filter performance use Filtran Premium Branded Filters.
